Your Culinary Journey

Discover the menu for your upcoming flight – including delicious meals, drinks, and special options, tailored to your route and cabin. On selected flights, you can even pre-order your favourite dish in advance.

- * Please note that your selected package for CO₂ savings cannot be refunded if you cancel or rebook your flight.
- * We would like to point out that you are not entitled to have the amounts paid for your package for CO₂ savings passed on to a specific cooperation partner of the Lufthansa Group climate protection portfolio.
- * Rather, the selection of cooperation partners for climate protection projects is at the discretion of the Lufthansa Group.
- * For the package for CO₂ with a share of sustainable aviation fuel (SAF), you will receive Points for flights operated by Lufthansa Group, co-issuing Miles & More airline partners and STAR Alliance Airlines. For flights operated by Lufthansa Group and the co-issuing Miles & More airline partners, you will also receive Qualifying Points in the same amount and (for Business Class and First Class flights) additional HON Circle Points up to a maximum of +20%. Flight award tickets and reduced-price tickets within the travel industry (e.g. ID or AD) are generally excluded from earning miles and Points (Points, Qualifying Points and HON Circle Points).
- * If you're a Miles & More member but not a Frequent Traveller, Senator or HON Circle Member, the price of the respective package for CO₂ saving (without VAT) will always be multiplied by a factor of 4. For members with frequent flyer status, the factor depends on the airline operating the flight. The factor is 6 if the flight is operated by Air Canada, Air Dolomiti, All Nippon Airways, Austrian Airlines, Brussels Airlines, Croatia Airlines, ITA Airways, LOT Polish Airlines, Lufthansa, Lufthansa City, SWISS or United Airlines. The factor is 5 for Eurowings and all other Miles & More airline partners.
- * Sustainable Aviation Fuel (SAF) is made from renewable sources and, while emitting similar CO₂ during combustion as conventional kerosene, achieves at least 80% lower lifecycle emissions. To contribute to saving CO₂ emissions, we calculate the fuel required based on the estimated CO₂ emissions and ensure that this amount of SAF is used on future

Lufthansa Group flights. All SAF offered to customers is purchased in addition to the EU-mandated 2% quota already included in the ticket price and is used within six months of the respective flight. SAF feedstocks do not compete with food production and must meet strict sustainability criteria under RED II and RefuelEU, verified by independent auditors. Today, SAF accounts for less than 1% of global aviation fuel. Flying has further impacts on the climate beyond CO₂ emissions.

- * Airport Security charge is potentially refundable for transfer passengers arriving from USA, Canada, United Kingdom, Singapore, Montenegro or Belgrade, having transfer in FRA Terminal 1 with no additional security check in FRA. For potential refund of this charge please contact the Lufthansa Service Center.
